2. European Roulette Live (Single Zero)
3. American Roulette Automated (Double Zero)
4. American Roulette Live (Double Zero)

SUPPORTED JACKPOTS

SUPPORTED PRODUCTS
Following its concept to develop highly advanced software for all kinds of multiplayer games, terminals and systems, EGT Multiplayer LTD has created Rigel and King HD series to combine the video slot, card and roulette games with four level mystery jackpot system - Jackpot CARDS.

Players have the opportunity to win four different mystery jackpot levels via the "Jackpot Cards" bonus game, which is randomly triggered after the finish of the basic game. The bonus game starts with 12 cards faced down. From them players must collect 3 cards of the same suit, to reach the jackpot corresponding level - Clubs, Diamonds, Hearts and Spades. It is not necessary to participate with the maximum bet to trigger any of the levels. However, the higher the qualifying bet in the basic game, the higher the chance to enter the Jackpot Cards bonus game and win the highest mystery jackpot level.

Attractive and drawing attention Jackpot System, which aims to keep the interest and enjoyment of players while placing bets on roulette. With fascinating animation and sound, this jackpot system consists of two levels - Diamond and Sapphire. It supports both European (Single zero) and American (Double zero) wheel.

Only Straight bets are eligible to WIN Jackpot. If more than one player triggers one of the two levels, the Jackpot amount is split equally or proportionally between the winners.
